INTERNSHIP CERTIFICATE

DECLARATION

I, Ms. Aarti Chettiar, hereby declare that this SIP Project Report is based on my 2 months internship done at M/s Infiniti Software Solutions Private Limited, as a Finance Intern, during the period from June 2nd to July 31st under the guidance of Mr. Yogesh B, Finance Executive, Infiniti Software Solutions Private Limited and Indian School of Science and Management, Chennai.

Place: Chennai

ACKNOWLEDGEMENT

I have undergone extensive training to complete this internship. However, it would not have been possible without the kind of support and help of many individuals. I am using this opportunity to express my gratitude to everyone who has supported me throughout this internship period.

I would like to express my sincere gratitude to our respected Chairman, **Mr. KATHIRVEL GANAPATHIAPPAN**, for providing us with the valuable opportunity to carryout and complete our project.

I express heartfelt thanks to our visionary, dedicated, and empowering Founder and Managing Director, **Dr. PARKAVI MAHALINGAM**, for her continuous support and meaningful guidance, which played a key role in our progress.

I am highly indebted to our Principal, **Mr. A. RANJITH KUMAR**, for his guidance and constant supervision and also for providing necessary information regarding the project and for his support in completing the project.

I would also like to thank all the Staff who provided me with the facilities and conducive conditions that were required for this project.

My sincere gratitude to **MR. YOGESH B, FINANCE EXECUTIVE, M/s INFINITI SOFTWARE SOLUTIONS PRIVATE LIMITED**, for mentoring me and offering immense support and knowledge during my internship.

EXECUTIVE SUMMARY

The Summer Internship at M/s Infiniti Software Solutions Pvt. Ltd. was a transformative and career-defining experience that provided valuable exposure to the practical side of finance in a SaaS-driven environment. Running from June 2nd to July 31st, 2025, the internship focused on understanding financial workflows, using automation tools and ensuring proper reconciliation and reporting across platforms like Razorpay, Wallet systems, Excel and Tally ERP. The internship started with a role-mapping exercise. I studied and documented the responsibilities of different finance team members. This gave me a complete understanding of how tasks connect within the department and how each role contributes to larger organizational goals. Building on this foundation, I worked on improving automation in the second week by identifying repetitive manual tasks and suggesting ways to streamline them. These efforts showed how important efficiency is and how process level improvements can free up time for critical financial activities. A large part of the internship focused on Accounts Receivable management, especially matching receipts from Razorpay with corporate payment advice. This work was essential for preparing debtor aging reports and identifying old balances. I also coordinated with regional teams, specifically the Mumbai office, to collect missing details through calls and emails. This experience improved my professional communication skills and taught me how to manage dependencies between teams. In the later stages, I gained hands-on experience in Wallet-based reconciliations, real-time transaction tracking and ledger postings in Tally ERP. I worked on matching incentives provided by external parties, such as airlines, to ensure correct classification and closing balances.

During the year-end audit for FY 2024-25, I actively helped reconcile balances, clear suspense accounts and prepare ledgers for the audit. This experience deepened my understanding of financial compliance, accuracy in reporting and the importance of timeliness during fiscal closures. I learned the value of keeping organized documentation, handling data with accuracy and being adaptable in fast-paced environments. The ongoing guidance from senior finance professionals helped me refine my analytical skills, process-oriented thinking and communication abilities crucial for a successful career in finance. In summary, this internship

connected academic learning with corporate practice, exposing me to real-world financial operations that extend beyond textbook theories.

CHAPTER 1
INDUSTRY AND COMPANY OVERVIEW

1.INDUSTRY AND COMPANY OVERVIEW

1.1 GLOBAL LANDSCAPE

The accounting and financial software industry is undergoing a pivotal transformation, driven by advancements in technology, evolving regulatory frameworks and the growing need for real-time financial insights. Once limited to traditional bookkeeping functions, today's financial tools have evolved to include automation, advanced analytics, seamless integration and statutory compliance capabilities.

Cloud computing has played a key role in this evolution, offering businesses of all sizes the benefits of flexibility, scalability and remote access to financial data. A major catalyst behind this shift is the integration of artificial intelligence (AI) and robotic process automation (RPA), which streamline repetitive tasks such as reconciliations, invoice processing and ledger categorization. This not only reduces manual effort but also enhances accuracy and ensures better audit preparedness.

A large part of the industry's growth can be attributed to the widespread adoption of SaaS-based accounting solutions, which provide both cost efficiency and operational agility. Within this broader landscape, financial reconciliation software has emerged as a critical sub-sector. As businesses increasingly prioritize transactional transparency and real-time cash flow monitoring, the demand for reconciliation tools is surging. The global reconciliation software market is projected to grow from USD 2.30 billion in 2025 to USD 6.44 billion by 2032, registering a CAGR of 15.8%. These solutions are becoming essential, particularly in high-volume transaction industries such as fintech, e-commerce, travel and enterprise finance.

1.2 THE INDIAN CONTEXT

Sectors such as travel and professional services characterized by high transaction volumes and complex settlements are now demanding niche financial solutions. These industries benefit greatly from domain-specific SaaS platforms that support wallet integrations, IATA/BSP reconciliations and automated bank matching. Consequently, fintech providers that offer customized, scalable solutions tailored to industry workflows are gaining competitive advantage and driving innovation in the Indian software-as-a-service market.

The travel and service industries in particular have seen increased demand for customized financial tools, especially those that can handle large volumes of transactions, wallet-based settlements, BSP reporting and real-time bank reconciliation. As a result, companies that offer vertical-specific SaaS products tailored to these needs have gained prominence in the Indian market.

The adoption of digital tools like Tally ERP, Zoho Books, Razorpay and mobile-based wallets is becoming mainstream, aiding in seamless payment processing, real-time expense tracking and audit-ready reporting. This transformation is further amplified by national programs like Digital India, which are fostering a tech-savvy ecosystem and encouraging transparency in financial operations.

1.3 COMPANY OVERVIEW: INFINITI SOFTWARE SOLUTIONS PRIVATE LIMITED

1.3.1 BACKGROUND AND OPERATIONS

Infiniti Software Solutions Pvt. Ltd. is a Chennai-based technology company specializing in automation-driven SaaS products. Founded in 2005, the company has carved out a niche in financial and travel technology solutions, serving clients in over 45 countries. Infiniti's core mission is to reduce manual workloads and enhance financial accuracy through real-time, cloud-based platforms.

Rather than offering broad-spectrum ERPs, Infiniti focuses on domain-specific pain points such as reconciliation delays, settlement mismatches, travel expense workflows and incentive tracking. This focused approach has allowed the company to develop tools that integrate seamlessly with legacy systems like Tally ERP, payment gateways like Razorpay and internal corporate wallets.

Its clientele includes travel aggregators, airlines, enterprise finance teams and mid-sized businesses who rely on Infiniti for tasks ranging from bank reconciliations and ledger management to audit-ready documentation and incentive analysis.

1.4 STRATEGIC FOCUS AND CULTURE

Infiniti's organizational culture emphasizes innovation, agility and deep domain understanding. The company actively seeks feedback from its clients to refine and evolve its platforms. It offers a hybrid working model, cross-functional team exposure and structured onboarding for new recruits and interns, enabling them to understand both technical tools and business processes. With automation and accuracy as its guiding principles, Infiniti continues to position itself as a "problem solver" for mid-market companies struggling with high transaction volumes and compliance-heavy operations.

1.4.1 KEY PRODUCTS AND SERVICES

Infiniti Software Solutions offers a portfolio of specialized platforms aimed at addressing the operational inefficiencies and compliance challenges in the travel and finance sectors. Each solution is designed with domain-specific workflows and scalability in mind, ensuring usability for both mid-sized firms and enterprise clients.

a) Xpense.Co / ExpenseOut

A robust, cloud-native Travel & Expense Management System (TEMS) built to streamline end-to-end employee travel workflows. It simplifies tasks such as travel request initiation, policy-based approval routing, expense filing, reimbursement and analytics. Enterprises leverage this platform to gain centralized control over travel budgets, improve compliance and minimize out-of-policy spend.

b) Avo / AgencyAuto

A powerful automation platform developed specifically for travel agencies and consolidators. AgencyAuto integrates with major GDS and CRS systems to automate ticket issuance, supplier settlements, agency markup handling and ledger reconciliation. It is widely used in aviation and tourism sectors to manage high booking volumes and dynamic billing cycles.

c) Finlyte / VoyageAid

A digital wallet-integrated financial suite that supports high-frequency reconciliation, real-time revenue tracking, BSP (Billing and Settlement Plan) reporting and multi-channel payment aggregation. With capabilities to reconcile transactions across Razorpay, net banking, corporate cards and more, Finlyte ensures accuracy and compliance, particularly for GST and MSME filing mandates.

Key Cross-Platform Capabilities

- Seamless integration with Tally ERP, Excel sheets, GDSs and legacy financial systems
- Real-time dashboards with drill-down reporting and data visualization
- GST-compliance-ready architecture including IGST, CGST and SGST handling
- MSME Act-aligned compliance, audit trails and e-invoicing compatibility

Infiniti's product roadmap is shaped by continuous client feedback loops, allowing it to respond rapidly to industry shifts, regulatory changes and evolving user expectations.

1.4.2 VISION, CULTURE AND STRATEGIC DIRECTION**Company Vision, Values and Strategic Approach**

Infiniti Software Solutions operates with a strong and forward-looking vision: "To simplify financial and operational complexity through automation and innovation." This guiding principle defines not only the company's product development but also its internal culture and strategic positioning in the global financial technology space.

Vision and Strategic Approach

Infiniti's strategic roadmap is designed to address the evolving challenges faced by finance teams across industries. Rather than building generic accounting systems, the company emphasizes intuitive platforms that bridge the gap between traditional finance operations and modern digital technology. Its solutions go beyond routine bookkeeping, offering automation-led tools for reconciliation, compliance and reporting functions that are critical in today's data-driven business environment.

Core Organizational Values

Infiniti's operations are anchored in a set of core values that guide both internal decision-making and client engagements:

- **Customer-First Product Design:** Solutions are developed with end-user needs at the center, ensuring usability and practical value.
- **Continuous Innovation:** The company actively monitors real-time market shifts and regulatory updates, adapting its tools to remain ahead of industry requirements.

- **Transparency and Integrity:** Strong emphasis is placed on secure, accurate and ethical data management, ensuring stakeholder trust.
- **Collaboration and Impact Orientation:** Teams work cross-functionally with the shared objective of delivering outcomes that have measurable business impact.

1.4.3 Workplace Culture

Internally, Infiniti fosters a performance-driven yet employee-centric culture. The organization balances high accountability with a strong emphasis on employee growth and well-being. It supports hybrid working models, enabling flexibility and productivity. Employees are encouraged to engage in cross-functional learning opportunities and are often invited to contribute ideas for product innovation. This bottom-up approach to innovation ensures that frontline teams whether in finance, engineering or client solutions play an active role in shaping the company's product pipeline. In addition, leadership grooming and skill development are prioritized, preparing employees to take on larger responsibilities as the company scales.

Strategic Positioning

Unlike traditional ERP vendors, Infiniti's differentiation lies in its niche specialization. Its focus is not on providing a one-size-fits-all system but on designing tools that streamline complex financial operations. By offering vertical-specific automation and compliance-oriented solutions, the company is well-positioned to serve clients in industries that demand high accuracy, such as travel, banking and insurance. This strategy ensures sustainable growth in a competitive market, while reinforcing Infiniti's reputation as an innovative, domain-first automation partner.

1.5 SWOT ANALYSIS

1.5.1 STRENGTHS:

- **Domain Leadership in Travel-Tech Finance:** With 20+ years of B2B experience, Infiniti is recognized for automating niche-heavy workflows like BSP settlements, Razorpay-Tally integrations and bulk reconciliation.
- **Purpose-Built SaaS Tools:** Products are designed based on real operational needs in travel finance and agency workflows, offering immediate business value.

- **Highly Integrable Architecture:** Supports seamless connectivity with Tally ERP, GDS platforms (Amadeus, Sabre), banks and fintech tools reducing client migration resistance.
- **Sustainable Global Expansion:** With presence in 45+ countries, Infiniti has expanded responsibly while maintaining deployment quality and client satisfaction.

1.5.2 WEAKNESSES:

- **Limited Horizontal Product Coverage:** The firm is not currently present in broader sectors like HRMS, SCM or retail automation, limiting cross-sector expansion.
- **Low Brand Visibility Outside Niche:** Due to limited marketing efforts and event presence, brand recall outside the travel/finance space remains weak.
- **High Dependence on B2B Travel Clients:** Market fluctuations in travel due to pandemics or airline regulations pose concentration risk.
- **Lack of Marketplace Ecosystem:** Unlike SaaS majors, Infiniti does not yet offer plug-in ecosystems or app marketplaces for modular extension.

1.5.3 OPPORTUNITIES:

- **Digitization Drive in Indian MSMEs:** Tailored, lightweight versions of its platforms can cater to MSMEs post-GST, who struggle with reconciliation and vendor tracking.
- **Emerging Market Penetration:** Expansion opportunities exist in Africa, Southeast Asia and the Middle East where similar compliance gaps exist.
- **Strategic Fintech Collaborations:** Integrating with ERPs (SAP B1, Tally Prime, Zoho) and fintech tools enhances its “add-on” value without competing directly.
- **Rise of Micro-Automation:** As global firms invest in hyper-specific process automation (e.g., GST + Razorpay matching), Infiniti is well-positioned to lead.

1.5.4 THREATS:

- **Competitive Pressure from Giants and Startups:** ERP leaders like SAP and agile startups with AI-first interfaces are aggressively entering the automation space.
- **Client Churn Risk from Full-Stack Suites:** Enterprises may shift to platforms offering bundled HR, CRM and Finance modules under one roof.

- **Innovation Lag Risk:** Clients expect fast-paced updates, new integrations and next-gen features. Delays can lead to dissatisfaction.
- **Data Privacy and Compliance Risks:** Growing regulatory frameworks (GDPR, India DPDP Act) require strict adherence and any breach could be detrimental.

1.6 KEY COMPETITORS

Infiniti operates at the intersection of travel automation, financial reconciliation and expense management. While its solutions are deeply niche, it competes with various types of players:

1.6.1 ERP & ENTERPRISE SUITES

Company	Core Product(s)	Key Focus Area
Zoho Corporation	Zoho Books, Zoho Expense	Integrated SME ERP with modular deployment
SAP	SAP Concur	Enterprise-grade travel and expense workflows

1.6.2 SPECIALIZED INDIAN SAAS PROVIDERS

Company	Core Product(s)	Key Focus Area
Happay	Happay Expense	Prepaid card automation and control
Fyle	Fyle Platform	Reimbursement and policy enforcement
Finly	Finly Suite	Vendor payments and invoice workflows

1.6.3 GLOBAL ACCOUNTING PLATFORMS

Company	Core Product(s)	Key Focus Area
QuickBooks	QuickBooks Online	Cloud accounting for SMEs and freelancers
FreshBooks	FreshBooks	Invoicing and basic expense tracking

1.7 COMPETITIVE POSITIONING

Infiniti Software Solutions has carved a strategic niche in process-specific financial automation, especially for industries with high transaction complexity like travel, aviation and professional services. Unlike one-size-fits-all ERP platforms, Infiniti's tools are built with deep domain configurability supporting customized approval flows, IATA workflows, GST compliance and Tally integration.

Its solutions, such as ExpenseOut and Finlyte, are designed to unify disparate financial data streams from payment gateways, corporate wallets, banks and ledgers into standardized, auditable records. This real-time visibility empowers finance teams to improve reporting accuracy, reduce manual work and mitigate compliance risks.

While large ERP vendors offer scale, they often come with rigidity, lengthy implementation cycles and high costs. Meanwhile, lightweight SaaS players may lack depth or security infrastructure. Infiniti bridges this gap by offering modular, integration-ready and compliance-aware tools that are agile enough for mid-sized firms yet powerful enough for enterprise operations.

1.8 KEY MILESTONES

Infiniti Software Solutions started its journey in 2005, founded in Chennai, India. The goal was to simplify and automate financial operations for the travel industry. The founders aimed to create technology-based solutions that could connect traditional finance processes with the changing digital needs of travel agencies. They saw the increasing complexity of financial reconciliation, billing and compliance in travel operations. The company sought to develop tools that would streamline these workflows and provide more visibility, control and accuracy. A big breakthrough came in 2008 with the launch of AgencyAuto, Infiniti's main product designed to automate ticket bookings and Global Distribution System (GDS) reconciliations. This product significantly cut down on manual work and errors during the booking process, giving travel agencies a platform to manage bulk transactions easily. Automating GDS reconciliation often a challenge for travel firms helped Infiniti establish itself as a trusted partner in the travel-tech field. In 2011, the company built on this success by expanding into Southeast Asia and the Middle East, where digital travel solutions were rapidly growing. Infiniti gained over 50 clients in these areas, mainly among mid-sized and larger travel agencies

seeking to digitize their operations. This international growth marked Infiniti's transition from a local startup to a globally recognized SaaS provider.

By 2013, Infiniti had over 100 global clients, achieving notable success in managing airline billing, BSP (Billing and Settlement Plan) processes and financial reporting. The platform's accuracy and automation features began to replace traditional spreadsheet-based reconciliation and manual accounting methods, which often led to errors and compliance problems. The increasing client base further confirmed Infiniti's fit in the specialized travel-finance market. In 2015, the company introduced another innovative platform, ExpenseOut, aimed at automating travel expense management from claim submission to final reimbursement. ExpenseOut provided new transparency and control over corporate travel spending by incorporating policy checks, real-time approval workflows and digital receipts. Since travel is a significant expense for many businesses, this product opened new markets for Infiniti beyond traditional travel agencies, including corporates and large enterprises.

In 2017, Infiniti adopted a fully cloud-based SaaS model to offer flexibility and scalability in the digital age. This change allowed for quicker deployment, better system uptime, enhanced data security and easier integration with client systems across borders. With this shift, Infiniti could expand globally without being limited by on-premise software constraints. In 2020, amid the global shift toward automation and digital transformation, Infiniti launched Finlyte, a product focused on improving financial reconciliation, wallet tracking and compliance workflows. Finlyte was targeted at finance teams managing high transaction volumes, offering features such as automatic payment matching, audit trails and smart alerts. The product was particularly important in a post-pandemic business climate where remote financial management and digital accountability became essential. The momentum continued in 2022 as Infiniti enhanced its integrations with key financial tools like Tally ERP, Razorpay and various banking APIs. These connections let users sync data easily across payment gateways, accounting systems and banking platforms, reducing reconciliation time and improving financial accuracy. The ability to connect with widely used tools made Infiniti's solutions more appealing to mid-market businesses already utilizing these platforms. In 2023, the company focused on compliance automation.

CHAPTER 2
JOB / TASK DESCRIPTION

2. JOB / TASK DESCRIPTION

2.1 OBJECTIVES OF THE INTERNSHIP

The primary objective of this internship was to bridge the gap between classroom learning and the practical functioning of a corporate finance department. Conducted at Infiniti Software Solutions Pvt. Ltd. from June 2 to July 31, 2025 the internship was structured to provide exposure to various aspects of financial operations within a SaaS-based automation company.

The key objectives included:

- Understanding organizational roles and workflows in a finance department.
- Identifying opportunities for automation to streamline routine processes.
- Applying accounting and reconciliation knowledge using real data and tools like Tally ERP and Razorpay.
- Participating in audit closure activities reconciliation and sundry debtors.
- Developing professional communication and collaboration skills within a structured finance team.

2.1.1 METHODOLOGY AND APPROACH

The internship was designed as a task-based and timeline-oriented program, with each week focusing on specific functional areas and real-time deliverables. The work was carried out under the guidance of the Senior Accounts Executive and the finance team, combining observation, participation and independent execution.

2.2 INITIAL ONBOARDING AND TRAINING

The internship commenced with a structured onboarding process to familiarize interns with Infiniti's internal systems, finance workflows and tools. Key highlights of this phase included:

- Introduction to the finance department's hierarchy and reporting structure.
- Overview of the organization's products and their financial implications (especially those with wallet or settlement components).

- Hands-on training with Tally ERP including ledger structure and voucher entry
- Internal sessions on Excel usage for financial reporting, including pivot tables and formula-based templates.
- Guided walkthroughs of reconciliation processes, including how DSR, Wallet and BSP reports are used.

This foundational phase helped establish conceptual clarity and prepared the intern to take on progressively independent responsibilities.

2.3 WORK PLAN AND SCOPE

The internship lasted for 2 months, from June 2 to July 31, 2025 coinciding with the financial year-end. The work was phased to match the company's closing timelines and the intern gradually progressed from observation to execution of key deliverables across the following focus areas:

2.3.1 Team Role Mapping

Shadowed finance team members to understand their responsibilities and the workflow across reconciliation, ledger posting and audit preparation.

- Created a reference report mapping job roles and inter-departmental coordination.
- Gained clarity on internal communication, task ownership and document flow.

2.3.2 Process Automation

Analyzed recurring manual tasks and suggested Excel-based automation for ledger mapping.

- Prepared a report recommending process improvements to enhance team productivity.
- Understood the role of time optimization in compliance-driven environments.

2.3.3 Reconciliation Of Razorpay And Receipts

- Performed knock-off by matching Razorpay transactions with payment advice for the April 25 to June 15 period.
- Initiated coordination with the Mumbai regional team to resolve pending entries.

- Contributed to ageing report preparation for better tracking of outstanding debtors.

2.3.4 Wallet And Tally Integration

- Used the company's Wallet system to track real-time collections, refunds and settlements.
- Filtered Razorpay reports and mapped validated transactions into Tally ERP.
- Ensured accurate ledger posting, narrations and reconciliation with Wallet balances.

2.3.5 Incentive Matching And Audit Closure Activities

- Compared airline incentive statements with Tally balances to verify receivables.
- Worked on year-end closing of outstanding balances and supported documentation efforts.
- Assisted in debtors matching and flagged discrepancies for senior review.

2.3.6 Razorpay Ledger Posting And Suspense Resolution

- Posted ticketing-related receipts and refund entries into Tally with appropriate classification.
- Verified Razorpay wallet balances and began reconciliation of June bank statements.
- Cleared suspense entries under supervision of the accounts head.

2.3.7 Pending Knock-Off And Final Ledger Checks

- Completed knock-off for transactions between June 15 and July 15 to update outstanding records.
- Reconciled Razorpay and Wallet data with Tally to maintain financial accuracy.
- Resolved unclassified bank entries and prepared final ledgers for audit.

2.3.8 BRS Finalization And Debtor Reconciliation

- Consolidated June bank statements and prepared Bank Reconciliation Statements.
- Verified and finalized debtor balances by cross-checking with ageing schedules and Tally reports.

- Supported the finance team in preparing final reports and documentation for audit closure.

2.4 TIMELINE OF ACTIVITIES

Week 1 (June 2 – June 9, 2025)

- Underwent the onboarding process and introduction to the finance department.
- Shadowed each team member to understand their core responsibilities within the finance department.
- Created a report mapping job roles and workflows.

Week 2 (June 10- June 13, 2025)

- Analysed routine manual tasks performed by the finance team to identify opportunities for automation.
- Prepared a report suggesting automation of repetitive processes such as ledger posting and reconciliation inputs to save time. Eg (Salesforce CRM)
- Focused on improving efficiency so that team members could allocate more time to analysis.

Week 3 (June 16 – June 27, 2025)

- Worked on the knock-off process by matching Razorpay receipts with payment advice for corporate transactions from April 25 to June 15.
- Initiated communication with the Mumbai region's finance contact via email and calls to collect missing data or clarifications.
- Accounted bank statements for May 2025.

Week 4 (June 30 – July 4, 2025)

- Gained hands-on experience with the company's Wallet system to track real-time collections, settlements and refunds.
- Downloaded Razorpay transaction reports and filtered relevant data for reconciliation purposes.

- Mapped and posted verified transactions into Tally ERP under appropriate ledgers with accurate narrations.
- Ensured alignment between Wallet balances and Razorpay entries to maintain consistency and accounting accuracy.

Week 5 (July 7- July 11, 2025)

- Worked on incentive matching by comparing airline-provided incentive sheets with Tally ledger balances.
- Verified whether the closing balances matched the outstanding amounts for March and other months.
- Assisted in year-end audit closing tasks, including debtors matching and reconciliation of pending balances.

Week 6 (July 14- July 18, 2025)

- Handled Razorpay transaction reports by extracting data for ticketing-related receipts and refunds.
- Classified transactions into receipts (positive entries) and refunds/charges (negative entries) for accurate accounting.
- Posted validated entries into Tally ERP under the correct ledger accounts with clear narrations.
- Started bank reconciliation for June by reviewing statements and clearing entries in the suspense account with guidance from the senior accounts head.

Week 7 (July 21- July 25, 2025)

- Continued the pending knock-off process for transactions between June 15 and July 15 by matching receipts with payment advice.
- Performed final reconciliation of Razorpay entries, ensuring accurate classification of ticketing sales, refunds and charges.
- Posted remaining entries into Tally ERP, maintaining consistency with Wallet and Razorpay data.

- Assisted in clearing the suspense account by verifying June bank statement entries with support from the senior accounts head.

Week 8 (July 26- July 31, 2025)

- Compiled and consolidated bank statements for the June period to assist with final Bank Reconciliation Statements (BRS). Extracted Razorpay transaction reports till June 2025.
- Reviewed unreconciled items and updated entries in Tally after discussion with the accounts head.
- Finalized debtor balances.

2.5 TOOLS AND SOFTWARE USED**2.5.1 Tally ERP-**

The internship provided practical exposure to Tally ERP, which acted as the backbone of financial accounting at Infiniti Software Solutions. I used it extensively for daily postings, proper ledger classification, GST verification and reconciliation of balances. Working on Tally helped me understand how ERP systems integrate multiple aspects of finance accounts receivable, reconciliations and reporting into a unified platform.

2.5.2 Microsoft Excel-

Excel proved to be an essential tool for report preparation and financial analysis. I used it for tasks such as summarizing Daily Sales Reports (DSR), preparing MSME tracking sheets, verifying GST classifications and building BRS schedules. By applying Pivot Tables, VLOOKUP and conditional formatting, I was able to convert raw data into meaningful financial insights that were audit-ready and easy to interpret.

2.5.3 Wallet System-

The company's internal Wallet system provided real-time visibility into collections and settlements. I used it to track receipts, validate settlements and reconcile transaction-level activity against Razorpay and Tally entries. This system ensured transparency in financial flows and reduced dependency on manual checks.

2.5.4 Razorpay Dashboard-

Razorpay acted as a primary reconciliation platform during my internship. I extracted transaction reports for specific periods, identified discrepancies and matched them against ledger entries and payment advice. This process was crucial for knock-offs, debtor ageing analysis and ensuring accurate recording of receipts and refunds.

2.5.5 Microsoft Word-

Finally, Microsoft Word was indispensable for preparing structured reports, reconciliation notes and audit documentation. Word allowed me to record observations, maintain clarity in reporting formats and present reconciliations in a professional, easy-to-read manner for supervisors and auditors.

2.6 APPLICATION OF ACADEMIC KNOWLEDGE

One of the most rewarding aspects of the internship was the opportunity to directly apply concepts from my MBA (Finance) curriculum to real-world financial operations. The following are key areas where classroom learning was successfully integrated into practical tasks:

2.6.1 Bank Reconciliation

The theoretical knowledge gained in financial accounting and banking operations proved highly relevant during my work on Bank Reconciliation Statements (BRS).

- Applied the standard reconciliation process to match bank statements with entries posted in Tally ERP.
- Identified mismatches such as pending entries, uncredited cheques or unreconciled items and escalated them appropriately.
- Understood how timely BRS preparation contributes to accurate reporting, suspense account clearance and audit readiness.

2.6.2 Accounts Receivable

Concepts from working capital management and receivables management were directly put into practice while handling Accounts Receivable.

- Prepared and validated debtor ageing reports to track overdue balances and monitor payment cycles.
- Performed knock-offs, i.e., matching customer receipts against invoices, ensuring accuracy in outstanding balances.
- Assisted in debtor closing and confirmation, reinforcing the importance of liquidity management in corporate finance.

2.6.3 Accounting Systems and ERP Usage

Classroom exposure to accounting systems was expanded through practical application of Tally ERP in day-to-day transactions.

- Posted entries with appropriate ledger classification, narrations and GST categorization.
- Experienced how ERP systems integrate various financial functions—accounts receivable, reconciliations and reporting—into one platform.

Understood the role of structured accounting systems in ensuring compliance, data integrity and efficiency.

2.6.4 Financial Reporting with Excel

The knowledge acquired from data analysis and financial reporting courses was applied in preparing structured reports using Excel.

- Designed ageing schedules, reconciliation trackers and incentive mapping sheets with Pivot Tables, VLOOKUP and filters.
- Improved report readability by applying formatting standards, conditional highlights and clean tabular structures.
- Understood how Excel complements ERP systems in providing management-ready reports for decision-making and analysis.

CHAPTER 3
ANALYSIS OF JOB PERFORMANCE

3. ANALYSIS OF JOB PERFORMANCE

3.1 QUALITY OF WORK

Throughout the internship, a consistent focus was maintained on accuracy, completeness and clarity in financial reporting. The intern was entrusted with key responsibilities such as daily Tally posting, Razorpay reconciliation, wallet entries and debtor finalization, all of which demanded precision and consistency. The quality of work improved progressively moving from task observation to independently managing accounting operations.

- Entries were made in Tally with proper ledger classification, GST components and accurate narrations.
- Reconciliations involving Razorpay and Wallet were completed on time with minimal mismatches and any exceptions were escalated appropriately.
- Reports prepared in Excel such as ageing schedules and BRS sheets were cleanly formatted using Pivot Tables, filters and validation checks.
- The finance team appreciated the intern's ability to maintain clarity and completeness even during high-pressure audit and month-end periods.

3.2 TIMELINESS AND TASK OWNERSHIP

As the internship progressed, the intern exhibited a strong sense of ownership in handling daily responsibilities and time-bound assignments. Work was completed with minimal supervision and internal deadlines were consistently met across various functions.

- Razorpay reports and Daily Sales Reports (DSR) were processed and posted promptly.
- Ledger postings, reconciliations and audit documentation were submitted within expected timelines.
- Coordination for missing data (e.g., from the Mumbai region) was handled independently, reflecting proactive task handling.
- Any external dependencies or delays (e.g., missing vouchers) were communicated to the team leads in a timely and professional manner.

3.3 ADAPTABILITY AND LEARNING CURVE

The intern demonstrated strong adaptability to tools, formats and evolving responsibilities. Despite no prior exposure to Tally ERP, Razorpay, or Wallet systems, the learning curve was effectively managed within the first few weeks.

- Understood how to post various voucher types in Tally and apply correct GST classifications for receipts and expenses.
- Became proficient in using Excel for reporting tasks such as reconciliation summaries, incentive mapping and bank statement consolidation.
- Quickly learned company-specific reconciliation methods (e.g., knock-off procedures) and applied them with minimal error.
- Adapted to new tasks and tool updates without hesitation, showing willingness to self-learn and seek clarification when required.

3.4 COMMUNICATION AND COLLABORATION

Professional communication and teamwork were at the core of my internship experience at Infiniti Software Solutions Pvt. Ltd. Since finance is a process-driven function involving multiple stakeholders, effective communication ensured accuracy, timeliness and smooth task execution. The following aspects highlight how communication and collaboration played a role during the internship:

- **Maintained clear and respectful communication with senior accounts staff**
While working on reconciliations, ledger postings and audit preparations, I made sure to communicate in a concise and professional manner. Queries were raised with clarity and updates were shared regularly, which helped in resolving discrepancies quickly and maintaining transparency in task progress.
- **Effectively coordinated with regional team members (e.g., Mumbai office)**
Many knock-offs and ageing reports required additional payment details from the regional team. I regularly reached out through structured emails and follow-up calls, ensuring the tone remained professional yet assertive. This helped in collecting missing information on time, preventing delays in debtor closure and reconciliation.

- **Presented reconciled data and reports in a structured format**
Reports such as bank reconciliations, debtor ageing schedules and GST classifications were prepared in Excel with proper formatting. This practice not only enhanced readability but also reduced the time taken by seniors and auditors to verify entries. Presenting clean, well-organized reports made collaboration more efficient and effective.
- **Demonstrated maturity in handling feedback and clarifying doubts**
During the internship, I often encountered new processes and systems. Instead of hesitating, I proactively sought clarification whenever I was unsure, ensuring work was completed accurately. Feedback from supervisors was taken constructively and I adapted my approach in subsequent tasks, reflecting a commitment to continuous improvement.

Overall, this experience reinforced the importance of professional etiquette, timely communication and collaborative problem-solving. By staying open, respectful and proactive, I was able to contribute positively to the team's workflow and ensure that tasks were executed smoothly even under strict deadlines.

3.5 STRENGTHS DEMONSTRATED

- **Attention to Detail:** Maintained precision in ledger postings, reconciliations and GST classifications to ensure data integrity.
- **Ownership:** Took responsibility for assigned tasks and followed up on pending items without needing reminders.
- **Quick Learning:** Adapted to tools like Tally ERP, Razorpay Dashboard and Excel functions with minimal training.
- **Time Management:** Balanced multiple tasks such as DSR, reconciliation and audit documentation within tight deadlines.
- **Professionalism:** Communicated effectively, responded to feedback constructively and adhered to corporate etiquette.

3.6 AREAS FOR IMPROVEMENT

- **Excel Speed and Confidence:** Initial difficulty with complex Excel functions was overcome through daily use and practice.
- **Narration Quality in Tally:** Gradually learned to write clear, concise narrations linked to transaction context and account heads.
- **Audit Readiness Documentation:** Developed the habit of backing entries with proof like reports, screenshots and Excel logs for audit support.
- **Initial Hesitation in Reconciliation Formats:** Confidence improved by reviewing past formats and applying learning under supervision

CHAPTER 4
LEARNING OUTCOMES

4. LEARNING OUTCOMES

4.1 TECHNICAL KNOWLEDGE ACQUIRED

The internship offered hands-on exposure to a variety of core financial tasks, helping bridge the gap between classroom concepts and real-world financial operations.

- **Tally ERP Proficiency:** Gained in-depth understanding of voucher types, ledger structuring, GST classifications and narration standards. Regular posting of receipts, refunds and journal entries helped build speed and accuracy.
- **Reconciliation Processes:** Understood the end-to-end workflow of reconciliations using Razorpay reports, Wallet systems and bank statements. Learned how to match entries, identify exceptions and escalate unresolved issues.
- **GST Component Handling:** Learned to separate and verify IGST, CGST and SGST entries in line with transaction types. Applied this in Tally entries to ensure compliance with tax standards and audit readiness.
- **Incentive & Ageing Reports:** Acquired skills in incentive reconciliation and preparation of ageing reports that help track long-outstanding payments critical for audit and cash flow visibility.

4.2 PRACTICAL EXPOSURE TO BUSINESS PROCESSES

The internship offered insight into the structured operations of a finance department in a mid-sized SaaS company. Key business process learnings included:

- **Understanding Workflow Dependencies:** Learned how each function (posting, reconciliation, reporting) connects with others and impacts the overall financial accuracy and audit compliance.
- **Coordination Across Teams:** Experienced how information flows between departments (e.g., accounts, collections, audit) and how essential timely communication is for clearing discrepancies.
- **Period-End Closing Activities:** Understood the pressure and procedural discipline required for monthly and year-end closings, including ledger finalization, suspense clearance and audit documentation.

4.3 IMPROVEMENT IN ANALYTICAL AND SYSTEM THINKING

The nature of financial tasks required constant validation and comparison across tools like Tally, Excel, Razorpay and Wallet.

- **Cross-System Validation:** Developed a methodical approach to verifying transactions across systems and resolving mismatches e.g., comparing Tally ledger balances with Razorpay receipts and Wallet records.
- **Error Detection:** Became skilled at spotting inconsistencies in payment advice, duplicate entries or missing GST classifications and rectifying them before reporting.
- **Decision-Making Clarity:** Understood how small errors in financial data can lead to larger audit flags or reporting issues, thus learning the importance of accuracy in decision-making.

4.4 SOFT SKILLS AND PROFESSIONAL TRAITS STRENGTHENED

- **Time Management:** The internship enhanced my ability to prioritize and allocate time effectively. I learned to balance routine responsibilities such as ledger postings with periodic deliverables like reconciliation reports, audit documentation and monthly summaries.
- **Communication Skills:** I developed confidence in professional communication, both written and verbal. Drafting structured emails, clarifying doubts with precision and maintaining regular updates with supervisors strengthened my business correspondence abilities.
- **Adaptability:** Working in a dynamic environment required me to adjust to new tools, processes and reporting formats without relying on structured training sessions. I quickly familiarized myself with platforms like Razorpay and Wallet systems, showing initiative in self-learning.
- **Accountability and Professionalism:** The internship taught me to take complete ownership of assigned responsibilities. I ensured that follow-ups were diligently tracked, deadlines were honored and quality standards were met. Constructive feedback was welcomed and applied to improve my output, which strengthened my sense of accountability.

4.5 ALIGNMENT WITH ACADEMIC LEARNING

The internship served as a practical extension of MBA Finance subjects, reinforcing concepts learned in areas such as:

Academic Subject	Internship Application
Financial Accounting	Day-to-day ledger entries, journal adjustments, closing balances
Indirect Taxation (GST)	GST classification, input/output credit matching and reconciliation
Financial Reporting	Preparation of ageing reports, summaries and audit documentation
Corporate Finance & Compliance	Compliance with MSME rules, audit trail maintenance, suspense clearance
Use of Financial Systems	Extensive use of Tally ERP, Excel reporting and Razorpay integration

4.6 OVERALL REALIZATIONS

The internship offered far more than task-based training it provided a practical understanding of how financial accuracy, system integration and teamwork contribute to business success.

- Learned that automation tools and well-maintained records reduce audit risks and improve visibility into financial health.
- Realized the importance of being detail-oriented, especially in financial processes that require multi-step validation and cross-functional dependency.
- Experienced how a finance team functions as a backbone of business operations, ensuring compliance, reporting accuracy and timely decision-making.

4.7 PROFESSIONAL INSIGHTS AND LEARNINGS

The most valuable outcomes of the internship were the real-world application of academic learning and the development of a professional mindset. Below are some key takeaways:

a. Professional Development

- Adapted to the expectations of a corporate finance environment, where accuracy, accountability and initiative are highly valued.
- Improved professional communication skills through coordination with team members, regional offices and supervisors.
- Learned to work under time-sensitive conditions, particularly during month-end and audit-related closures, without compromising quality.

b. Technical Proficiency

- Acquired practical expertise in Tally ERP, Excel, Razorpay and Wallet systems, applying them to real-time accounting and reconciliation tasks.
- Enhanced ability to consolidate data from multiple sources, interpret reports and post validated entries into financial systems with accuracy.
- Gained experience in preparing structured financial reports aligned with management and audit standards.

c. Functional Understanding of Finance

- Observed the finance team's critical role as the custodian of compliance and accuracy in business operations.
- Understood the importance of timely reconciliations, ageing reports and suspense account clearance in ensuring healthy cash flow.
- Learned how automation and digital integrations such as Razorpay and Wallet simplify collections and reduce manual efforts.

d. Process Discipline and Accountability

- Recognized the importance of maintaining organized and traceable data records for audit and review.

- Developed habits of timely updates, clean documentation and systematic follow-ups, ensuring smooth workflows.
- Strengthened accountability by proactively resolving discrepancies and updating supervisors on unresolved items.

e. Adaptability and Continuous Learning

- Adjusted quickly to new financial systems, reporting formats and compliance requirements.
- Realized the impact of automation and process improvement suggestions in reducing manual workload and improving efficiency.
- Embraced a mindset of continuous learning, staying open to feedback and applying it to improve accuracy and speed.

CHAPTER 5
SUMMARY AND CONCLUSION

5. SUMMARY AND CONCLUSION

5.1 SUMMARY OF INTERNSHIP EXPERIENCE

The internship at Infiniti Software Solutions Pvt. Ltd. offered an immersive experience in a dynamic, automation-driven finance environment. Over a period of eight weeks, I was exposed to core financial functions, reconciliation processes, audit preparation and compliance documentation. The internship was not just about performing routine tasks but also understanding how each task contributed to the larger financial ecosystem of the organization.

From understanding departmental roles to independently handling reconciliations and supporting year-end closing, the journey reflected a steady transition from observation to ownership. I was given the opportunity to:

- Work with real-time data across tools like Tally ERP, Excel, Razorpay and the company's Wallet system.
- Participate in key functions such as bank and wallet reconciliations, GST classification, ageing report generation and suspense account clearance.
- Coordinate with team members and regional contacts for resolving mismatches and ensuring accuracy in accounts receivable.
- Suggest automation ideas to streamline manual processes, which were positively received by the senior finance team.

The tasks undertaken during this internship were aligned with the company's month-end and year-end financial timelines. These experiences enriched my practical knowledge of accounting systems, sharpened my analytical thinking and strengthened my ability to function in a structured, deadline-driven corporate environment.

5.2 KEY TAKEAWAYS

Rather than merely applying textbook knowledge, the internship at Infiniti Software Solutions Pvt. Ltd. encouraged deeper thinking, practical execution and behavioral learning that go beyond academic understanding. The experience enhanced not just technical ability but also professional maturity. Some of the most valuable takeaways include:

5.2.1. Process-Level Thinking

- Understood that accounting is not just data entry, but a chain of interconnected processes that rely on data flow across systems like Razorpay, Wallet and Tally.
- Gained insight into how a single transaction touches multiple points—collection reports, ledger posting, reconciliation sheets and audit logs before it's finalized.
- Observed how each function, such as reconciliation, ageing report preparation and ledger finalization, must follow a sequence and how errors at one step impact the entire financial cycle.

5.2.2 Decision-Making Awareness

- Recognized the criticality of real-time financial accuracy and how delays or mismatches in data entry can affect key business decisions.
- Understood that unresolved entries or incorrect classifications (e.g., GST types or ledgers) can distort financial reports and compliance filings, leading to complications during audit.
- Learned how decisions on provisioning, suspense account treatment and reconciliation cut-offs are made with a mix of accounting logic, risk awareness and company policy.

5.2.3 Workplace Discipline

- Developed habits of daily report tracking, structured data entry and proactive follow-ups, essential for maintaining momentum in finance teams.
- Adopted proper file naming, data backup and documentation practices for easy audit access and internal clarity.
- Maintained punctuality in task execution, consistent reporting and professional etiquette in communication even when coordinating across teams or escalating unresolved issues.

5.2.4 Exposure to Corporate Compliance Pressure

- Experienced how a finance team functions under stringent timelines during fiscal closures and how every team member's output contributes to audit readiness.

- Understood the importance of accuracy in regulatory compliance areas like GST, MSME and financial reconciliations, especially during final balance verification.
- Saw firsthand how companies align financial processes with external deadlines such as statutory filings, audits and stakeholder reviews.

5.2.5 Adaptability in a Digital Finance Environment

- Worked across multiple tools Tally ERP, Excel, Razorpay Dashboard, Wallet system—and learned how digital systems reduce dependency on manual operations.
- Realized how automation suggestions can bring real value by saving time, improving consistency and minimizing errors.
- Learned to quickly adapt to new processes and reporting formats, reinforcing a mindset of continuous learning and digital readiness.

5.2.6 Collaboration and Cross-Functional Coordination

- Understood the importance of inter-departmental collaboration in resolving reconciliation queries or clarifying payment-related discrepancies.
- Developed a sense of accountability in cross-team tasks, such as communicating with the Mumbai region or sharing final entries with the audit team.
- Built confidence in asking the right questions, updating stakeholders and responding professionally during review discussions.

These key takeaways have not only prepared me for a career in finance but have also instilled the confidence and clarity needed to contribute meaningfully in any team-oriented, system-driven, compliance-heavy financial role.

5.3 CONCLUSION

The internship was a valuable milestone in my academic and professional journey. It bridged the gap between theoretical understanding and practical application, enabling me to develop a solid foundation in:

- Accounting processes
- Reconciliation techniques
- Audit support activities
- Automation-driven financial operations

Moreover, working with a highly professional finance team gave me insight into how companies balance compliance, efficiency and scalability in today's business environment. The guidance, exposure and structured feedback received during the internship not only refined my technical skills but also enhanced my confidence and clarity about pursuing a career in corporate finance, accounting, or audit.

In conclusion, this internship has empowered me with the skills, discipline and understanding required to transition successfully from an MBA Finance student to a workplace-ready finance professional. It has equipped me with both the competence and the mindset to contribute meaningfully to any financial team or organization I become a part of in the future.

The internship at Infiniti Software Solutions Pvt. Ltd. offered a well-structured and immersive experience in the finance operations of a product-based technology company. Throughout the three and a half months, the intern worked alongside the finance team on key accounting and reconciliation tasks that were critical to the company's month-end and year-end closing processes.

The role evolved progressively from learning the tools and systems to handling recurring responsibilities like DSR processing, Tally entries, bank and wallet reconciliations and credit card tracking, eventually contributing to audit documentation and GST validations. The internship struck a balance between routine operations and learning-intensive activities, making the experience both challenging and rewarding.
